

Stargazing & More!

FLLS now has a telescope to loan out and the Coding Kit iPads have new apps!
Contact Nora to reserve either item!

Quickly identify stars, planets, constellations and satellites above by simply holding your iPhone, iPad or Apple Watch to the Night Sky! This is all done magically. Whether you're looking for a constellation or the International Space Station, let Night Sky direct you to it, then explore the object in AR!

SkyView® Lite is a beautiful and intuitive stargazing app that uses your camera to precisely spot and identify celestial objects in sky, day or night. Find your favorite constellations as they fade in and out while you scan across the sky, locate the Moon, discover distant galaxies, and witness satellite fly-bys.

Create your own selfies from outer space! NASA Selfies lets you put your photo in a virtual spacesuit in front of some of NASA's most captivating space images. This app was developed to celebrate the 15th anniversary of the launch of NASA's Spitzer Space Telescope, and features a collection of images that showcase its infrared data.
