20. If you do not have Faronics Console
    a. Log out of the Public userid
    b. Log in as Exec
    c. Follow your instructions to set Deep Freeze to Boot Frozen
    d. Log into Pubic after reboot, computer is ready for use.

Note: These instructions were written for Firefox version 103. Before changing privacy settings in the Public profile, you may need to log into Exec and open Firefox to allow it to update to the current version. To check your version of Firefox, click on the "Open application menu" button and then navigate to Help and then About Firefox. The About window will show you the version of Firefox as well as check for updates and apply them if needed. Deep Freeze needs to be thawed in order for the update to apply permanently
