16. If you do not have Deep Freeze Console
  - a. Log out of the Public userid
  - b. Log in as Exec
  - c. Follow your instructions to set Deep Freeze to Boot Frozen
  - d. Log into Public after reboot, computer is ready for use

Note: To check that you have the latest version of Google Chrome installed, click on “Customize and control Google chrome” and then “Help” and “About Google Chrome.” The About page will check for updates to Chrome and apply them. We recommend doing that before following the instructions above to be sure the screens match the directions.
