

Proposed Library Construction Grants for 2027

FLLS will have **\$1,171,777** to distribute.

Requests that have been made:

Apalachin – Project will replace the library’s front door with an automatic, ADA-compliant door system to improve accessibility. Project cost is \$6,250 with the library asking for **\$5,625** (90% funding).

Auburn – This project, the West Entrance Accessibility and Safety Project, will renovate and enhance the walkways, stairs, railings and ramps leading to the public entrance of the library. Refacing of the portico columns and adding an upgraded book drop are also included in the project. Project cost is \$439,574 with the library asking for **\$395,616.60** (90% funding).

Aurora – This heating improvement project will create two new basement heating zones that are needed for a library meeting room and library storage room where winter temperatures restrict use by patrons and staff. Project cost is \$5,966, with the library asking for **\$5,369.40** (90% funding).

Interlaken – This heating improvement project will replace two heat pumps in the library’s 2008 extension, which houses the children’s room. Project cost is \$19,735, with the library asking for **\$17,761.50** (90% funding).

Marathon - This project will address the heating, ventilation, and air conditioning needs of the library by providing an HVAC system that will cool the first floor and provide cooling and heating to the second floor. Heat pump compressors will be located outside at the rear of the building while fans and ductwork inside the building will be used to distribute the warmed/cooled air. An oil-fired boiler will be installed on the first floor to provide hydronic heating for fin tube radiation along second floor walls. Project cost is \$425,000, with the library asking for **\$382,500** (90% funding).

Total amount of funding requested: \$806,872.50
