

You can now control whether to allow AI-generated content into your reading list on Libby!

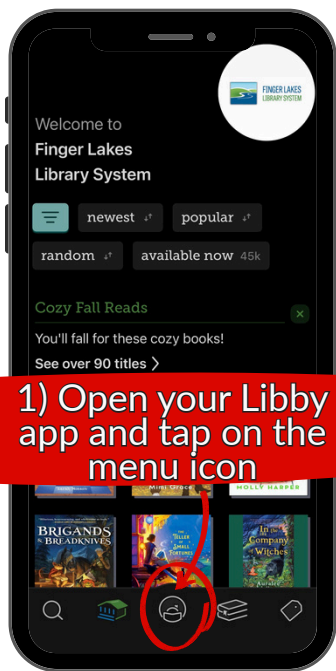

Here's how

- 1) Open your Libby app and tap on the menu icon
- 2) Scroll to the bottom and tap on Content Controls
- 3) Tap on AI Contributions
- 4) Choose whether to allow any involvement by AI authors, narrators, artists, or translators. The options are: all, human-involved, or human only
- 5) You can also choose whether to limit the filters to deep searches (the default, which is all searches outside your library system) or if you want the filter to apply to FLLS content, too
- 6) That's it! You can now read books and magazines and know that your preference about AI-generated content is being respected!
